PRODUCT INFORMATION

Big Buck Hunter takes digital hunting to the next level in 2012 with the release of the first-ever, high-definition bar and arcade game, Big Buck HD. Two years in the making, Big Buck HD is the first game of its kind designed with 1080p high definition graphics and new functionality that will change the video hunting experience. All Big Buck HD games will feature online connectivity, which will allow players to track scores through online accounts and compete in tournaments against players from across the country for cash prizes, making Big Buck HD a truly interactive experience. Other features of the new game will include: Enhanced Graphics: From grass blowing in the wind to life-like animals, Big Buck HD will feature a level of detail in the graphics not seen in a bar or arcade game before with the new two million-pixel 1080p HD monitor. Combination of Big Buck Hunter Pro and Safari: Big Buck HD combines the best of Big Buck Hunter Pro and Big Buck Safari into one game. Big Buck HD will feature three North American animals and two African safari animals with software updates featuring new animals available periodically. Dangerous Animal: New to the HD game is the Dangerous Animal, which is a special bonus animal that will randomly appear in scenes. The Dangerous Animal is new to the North American animal scenes and will replace the Trophy Animal in African safari scenes. Dangerous Animals will include ferocious creatures such as black bears, cheetahs or lions. Guns: Big Buck HD features a brand-new gun system that offers players more comfort in holding the gun and better accuracy required for the high-definition screen.
